

# Construction notice:

## Vollum Institute exterior removal

### Aging facade to be removed, replaced

The Vollum Institute's existing terracotta facade will be removed from the south side of the building, facing the courtyard. New exterior cladding will be installed in the spring. Safety and minimizing impacts to daily operations are the top priorities during this phase of construction.

Work to be done includes:

- Installation of covered scaffolding on the south side for access and protection from falling debris and a protective cover over the walkway from Richard Jones Hall to the front of Vollum
- Removal of all existing terracotta on the south facade of Vollum
- Cleaning the concrete structure and installation of a new weather barrier
- Replacement of all windows on the courtyard side of the building

---

South facade demolition  
Scheduled Jan. 18 - Feb. 29  
3:30 p.m. to 12 a.m.
